

Retail concepts & Liquidity

Sept 7th session.

- the street

L> understanding the "lt" putter-
markets only goal is to target
stop losses and inefficiencies

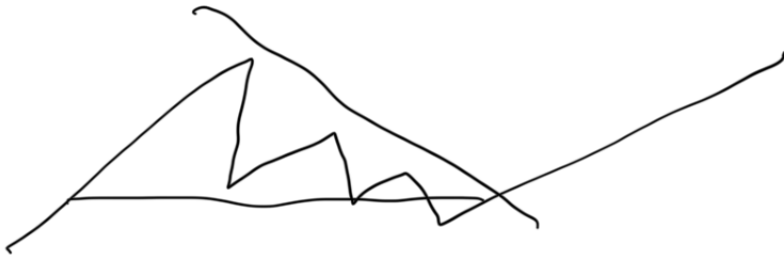

~~the~~

every target is
the high or low

the strat buys
the breakout
for the stop
losses

- follows the wedge pattern

- when we break the inside candle, we are hitting the stop losses.

- why not trade the strat?

- risk to reward is horrible,
hence why ICT is better

- the strat is still good to
look at broadening patterns

=> bad
trailing
session
