
Time P.1

Sept 10th session

↳ kill zone $\Rightarrow$ specific period

of time where volume is high
which results in higher price
action => how good price is
moving

→ london, asia, new york

indicator: ict killzones + pivots

→ asia is usually accumulation

Killzone pattern need to be taken
with a grain of salt, can't
trade ~~to~~ just based off
accumulation and distribution

↳ you won't often see major
liquidity be run outside of
a killzone
